SOLVING YOUR INDUSTRIAL AND MARINE ENGINE NEEDS

Established over 40 years ago, the company **ANE Industrial Supplies** has grown into one of the leaders in the mechanical and electronic prime mover and generation control industries in the sub-Saharan region.

We represent the leaders in manufacture and design of electro mechanical, mechanical and electronic prime mover control systems for both marine and industrial applications.

In addition to offering a comprehensive supply, repair, installation and commissioning facility for Woodward Governor Control Systems, we also offer tailor made industrial and marine service solutions, which include general service and engineering work as well as professional fuel injection services comprising of repair and replacement of units.

One area we are able to make a substantial difference in is through our offering of service and repair contracts on engines and power generation units of all types across Southern Africa. This service includes initial condition assessment and agreement to a structured proactive service programme. This programme offers basic mechanical services but extends to offering advanced condition based maintenance and monitoring, using the latest technology available, providing peace of mind by way of early alarm and notification devices.

Our team of experienced and dedicated specialists offer a wealth of experience in their field and work closely with customers to ensure that service delivery is provided in such a manner as to reduce downtime and maximise efficiency.
